

Solutions and Services for Cybersecurity Assurance

Industry-leading cybersecurity and cyber risk management and compliance for business and government.

Telos is a world-class provider of cybersecurity and information assurance solutions to the DOD, civilian federal agencies, the intelligence community, and commercial organizations.

Solutions for Cyber Risk Management and Compliance

Xacta®: Cyber risk management for the enterprise.

Xacta combines industry-leading security compliance and continuous risk assessment functionalities to establish an enterprise-wide security risk management solution. Its components include:

Xacta 360 — The premier solution for managing cyber risk and compliance of on-premises, cloud-based, and hybrid computing environments. It enables you to manage risk on a day-to-day basis through continuous assessment and ongoing authorization in accordance with the leading government and commercial standards. Xacta 360 is available as an on-premises, hosted, and commercial-cloud-based solution.

Xacta.io™ — Gives analysts an unprecedented understanding of their asset vulnerability landscape. Predictive Mapping automatically detects and plots the points of intersection among assets and vulnerabilities, and maps them to the relevant security controls. You can use these results to create reports for analysis and to understand trending security issues in their environment.

Xacta Compliance Campaign Manager — Empowers users to create and distribute OCIL-based surveys and questionnaires for manual security checks, enforce controls for leading security standards, and crosswalk controls from different frameworks for greater efficiency and less redundancy. Provides attestation and due diligence for internal and external supply chain against security policies.

Cybersecurity and Information Assurance Consulting Services

Organizations that need to comply with industry and government standards for IT security can turn to Telos Corporation to assure that they can meet them. We've served Fortune 500 companies, federal and defense agencies, and the

Intelligence Community with capabilities for assessing and evaluating their systems in advance of audits and testing for security authorization.

With over twenty years' experience in the most demanding security-conscious organizations, Telos is recognized among the most qualified information security consulting practices. More than 120 security engineers and analysts, cleared up to TS-SCI, make up the Telos IT security services team. Most are CISSP-certified, with subject matter experts who monitor news, events, and regulatory changes related to specific security areas and technologies. We also provide
